SKANSKA	Helping the operator avoid collision				ivoid	Warnings for the people in close proximity					Protecting the operator							Equipment for safe handling and working environment										Auxiliary equipment								
Skanska has requirements on safety equipment when purchasing new mobile machines and vehicles, our own older, hired and subcontractor's mobile machines. Requirements on this matrix is valid from 2019-01-01. (Skanska's requirements when purchasing new mobile machinery differs from requirements in this matrix).	Rearview camera w. display	Rearview camera on trailer	Reverse movement sensor	or workspace with hidden visibility	Additional camera on winches	Audible warning when reversing (On/off mode)	en reversing	Twin rotating beacon	Rotating beacon	Reflective markings on corners and protruding parts	Safetyglass, protective film and safetygrating. X4 (adjusted to application)	or roof windows	s on windshield and roof windows X5	Seat belt	Limitswitch for drilling sledge	Limitswitch for winch	Air conditioning. Filter adjusted for application	Operating instructions, visible for operator	l lock	Additional work lights. (Adjusted to application)	Work lights from bottom and up in mast	Norking lights around the machine in all directions		Visible security information, distance, extendable counterweight	Pendulum crawler tracks for secure placement	Fixed mounted lifting device	Fixed mounted whip check on compressor	Low pressure outlet	Safety break valve in case of hose failure	Wireless emergency stop	Anti-tip safety system (RCI-system=Rated Capacity Indicator)	Emergency stop	Alcolock	Fire extinguishing equipment according to SBF127	Belt knife	First aid kit

7/4 If 1 1 1 1 1																																				

X1: If equipped with cab

X2: Not 0 - 8 tons

X3: For wheeled excavators

X4: If theres a risk for flying stones/debris due to misfired explosives, quarrying e.g., windows is to be fitted with safety glass

X5: If necessary

X6: Retrofitting not allowed

X7: If equipped with fastfeed

X8: Portable fire extinguishers

X9: For Road-Rail Excavators Date of effect 2016-06-30.

X11: Supplement refers to Excavator and trucks. Date of effect 2019-01-01.

X12: Applies from model year 2016
